SUMMARY

Computer Science Engineering student with a strong foundation in full stack development and data structures and algorithms. Skilled in building scalable web applications using the MERN Stack and Python. Familiar with machine learning concepts with hands-on experience through a research-based project. Passionate about problem solving and developing real-world solutions.

EXPERIENCE

- **Full Stack Developer Intern – IBM (Partnership Program)** Jun 2025 – Jul 2025
 - Built full stack web applications using MERN technologies.
 - Developed REST APIs and gained experience in backend integration.
 - Worked with structured data and handled backend data processing for applications.
- **Web Developer Intern – Unified Mentor** Jun 2025 – Aug 2025
 - Developed responsive web interfaces using modern frontend technologies.
 - Improved user experience by optimizing UI components and layouts.

PROJECTS

- **HRMS Lite – Full Stack HR Management System** github.com/Aman5ingh19/HRMS-LITE
 - Developed a full-stack HR management system to manage employee records and attendance.
 - Designed and integrated REST APIs using Django with React frontend.
 - Optimized database operations using MongoDB Atlas for efficient data handling.
- **Phishing Email Detection using Machine Learning (Research Paper)** Certificate
 - Developed a phishing email detection system using a publicly available dataset from Kaggle.
 - Performed text preprocessing and applied NLP techniques for effective feature extraction.
 - Trained and compared multiple machine learning models including SVM, Random Forest, and AdaBoost using Scikit-learn.
 - Evaluated model performance using accuracy and AUC-ROC metrics to ensure reliable detection.
 - Worked with real-world text data including cleaning, preprocessing, and dataset quality improvement.
- **Health Tracker (MERN Stack)** github.com/Aman5ingh19/docodev-health-tracker
 - Developed a health tracking web application.
 - Implemented secure user authentication and health monitoring features.
 - Integrated backend APIs to provide disease prediction insights.
 - Handled structured and unstructured data for backend processing and API responses.

SKILLS

Languages: C++ (Data Structures & Algorithms), Python, JavaScript

Web Technologies: ReactJS, NextJS, NodeJS, ExpressJS, Django, MongoDB, Tailwind CSS

Developer Tools: VS Code, Git, Github, Jupyter Notebook, Google Colab

Soft Skills: Problem Solving, Communication, Teamwork, Adaptability, Time Management

CERTIFICATIONS

- Database and SQL – *Infosys Springboard* Apr 2025
- NoSQL and DBaaS 101 – *IBM / Cognitive Class* Jul 2025

PUBLICATIONS

- **Phishing Detection in Email using Deep Learning – IJMSRT** 2025

EDUCATION

K.R. Mangalam University

2023 – 2027

B.Tech in Computer Science and Engineering
